

Random Number Generator Certificate

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) by Skill On Net and found that the RNG complies with the relevant standards.*

Operator: Skill On Net

Operator URL: <http://www.skillonnet.com/>

Software provider: Skill On Net

Software provider URL: <http://www.skillonnet.com/>

The RNG uses a well-known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated shuffling for Single deck (without joker) for card games. iTech Labs has also conducted scaling tests for Slot, Roulette and Dice games.

The shuffling and scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card/number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

* The RNG was tested according to the Malta Remote Gaming Regulations S.L.438.04.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
