

## Random Number Generator Certificate

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) by Skill On Net and found that the RNG complies with the relevant standards.\*

The RNG uses a well-known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated scaling for Slots, Roulette and Dice games. iTech Labs has also evaluated card shuffling for single deck (without joker), single deck (with one joker), six decks (without joker) and 8 decks (without joker).

The scaling/shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the number and card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

- \* The RNG was tested according to Spillemyndigheden standards- SCP.01.03.EN.1.1 - Testing Standards for Online Casino.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
